TYRRELL ELEMENTARY SCHOOL MISSION STATEMENT

Tyrrell Elementary School is dedicated to the success and growth of globally competitive and environmentally responsible citizens. Together, as a community, we provide a safe atmosphere where students can become creative thinkers, collaborative problem solvers and effective decision makers. Through the commitment and cooperation of educators, parents, students, and community members, we can empower our children to work rigorously to be prepared for the twenty-first century. (Adopted, 2010)

SECTION 504

Section 504 is an Act that prohibits discrimination against persons with a disability in any program receiving Federal financial assistance. The Act defines a person with a disability as anyone who:

1. Has a mental or physical impairment which substantially limits one or more major life activities (i.e. caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working);
2. Has a record of such impairment, or
3. Is regarded as having such impairment.

Tyrrell County Schools recognizes a responsibility to avoid discrimination in its policies and practices regarding students and personnel. No discrimination against any person with a disability will knowingly be permitted in any of the programs and practices in the school system.

The responsibilities of Tyrrell County Schools under this Act include identification, evaluation, and if the child is determined to be eligible under Section 504, to afford access to appropriate educational services. Parents who disagree with the determination made by qualified professional staff in the school system have a right to a hearing with an impartial hearing officer.

NON-DISCRIMINATION POLICY STATEMENT

Tyrrell Elementary School Staff is committed to a policy of educating children for living by helping them to develop an awareness and appreciation for the achievements, problems, and aspirations of all people in our culturally diverse society.

The school staff shall help all children gain the knowledge, skills and determination that will enable them to reach their highest potential.

The school staff shall establish and maintain an atmosphere in which all persons can develop attitudes and skills for effective, cooperative living, including respect for the individual regardless of economic status, intellectual ability, race, creed, color, religion, gender, or handicapping conditions; respect for cultural differences; respect for economic, political and social rights of others; and respect for the rights of others to seek and maintain their own identities.

The school staff shall continue to promote good human relations by removing all vestiges of prejudice and discrimination in employment, assignment, and promotion of personnel; in the location and use of facilities; in curriculum development and instructional materials; and in the availability of programs for children.

Any student who feels that his/her rights have been overlooked has the right to seek help from the proper officials. The first step should be to speak with the principal regarding any alleged act of discrimination. If an individual is not satisfied with action taken by the principal, an appeal to the Title IX Coordinator by contacting Tyrrell County Board of Education at P.O. Box 328, Columbia, N.C. 27925 – Phone: 252-796-1121.

MEDIA COVERAGE

Tyrrell County Schools occasionally publishes students' accomplishments in various forms of media, including the local newspapers and the schools' websites. If you DO NOT wish to have your child's picture published for any school recognition, please contact principal as soon as possible.

EMERGENCY SCHOOL CLOSING

When it is snowing or sleeting, or highways and roads are iced or hazardous, the superintendent will decide if school will be held. The superintendent will attempt to have an announcement made by 6:30 am via the “Blackboard Connect” telephone system and on local television and radio stations as appropriate.

BLACKBOARD CONNECT CALL SYSTEM

The Blackboard Connect system is an automated call service that will dial each home in case of emergency. **It is imperative that updated telephone numbers be kept on file with the main office.**

On days when it is snowing or sleeting or roads are hazardous in Tyrrell County, bus drivers should not leave home before 6:30 a.m. unless an announcement has been made that schools are to operate that day. Since snow or sleet can change into rain on short notice, it is usually wise to delay a decision as long as possible.

When school is in session and there is an emergency warranting school closing, the superintendent, under the law, is authorized to suspend the operation of schools for the remainder of that day without loss of credit to the student.

ACADEMICALLY GIFTED PROGRAM (AIG)

The Differentiated Education Program of Tyrrell County Schools incorporates, within the core curriculum, a comprehensive program of differentiated instruction, which includes solving real problems, leadership and character development, and higher order thinking skills. This program stimulates and challenges students to develop and explore their individual interests, both inside and outside of school. Parents of AIG students will be invited to participate in the development of their child's Differentiated Education Plan within the first 30 calendar days of the child's enrollment in school. For more information about referral, identification and placement please contact Barbara Rhodes at 252-796-3881 or view Tyrrell County's Plan online at <http://www.tyrrell.k12.nc.us>, click "Exceptional Children/ AIG" on the right of the screen, then Document Uploads.

MEDICATION POLICY

For the safety and welfare of our children, the Tyrrell County Board of Education, with the assistance of the medical community, will implement a medication policy. The intent of this policy is to assure the safe administration of medications that must be administered during the school day by school personnel. The Tyrrell County Board of Education discourages the use of medications during the school day. However, for those medications that must be administered to a student during the school day this policy is to be implemented.

Tyrrell County Board of Education defines medication to mean “any prescription or over-the counter medication or supplement that a medical care source deems essential to be administered during the school day, by school personnel.”

Tyrrell County Board of Education will require that a Medication Authorization Form (form E1) be completed and signed by the physician and parent, before school personnel is allowed to administer the medication during the school day. It will also be required that the medication be in a container, labeled by a pharmacist, and transported to and from school by a parent/guardian for elementary school students. The Authorization for Medication Form is to be used for short-term and long-term prescriptions and over-the-counter medications.

TES SCHOOL DISCIPLINE

RATIONALE

The mission of the faculty, staff, and support personnel of TES is to provide a school environment that is safe, nurturing, and inviting. It is our goal to instill in each child the desire for self-control and proper behavior at all times. The following supports PBIS (Positive Behavior Interventions and Supports) philosophy of our school.

Students at all the grade levels need praise and recognition as well as structure with clear expectations and explicit boundaries. It is the intent of the staff to address these issues by implementing the following practices:

1. Provide every student the opportunity to receive positive recognition for achievements and accomplishments,
2. Provide parents/guardians with an on-going update of student's progress through conferences, notes and telephone calls,
3. Give students coaching and practical experience in problem-solving and dealing with authority, and
4. Use literature based strategies to promote positive discipline.

BUS PROCEDURES

The faculty and staff at Tyrrell Elementary School are dedicated to the safety and well-being of each of our students. Nowhere is safety more important than the school bus. As a result, we ask families to keep the following concepts in mind to help us ensure the safety of all students who ride our buses.

- 2- Students should be well off the road (at least two car lengths).
- 3- Students should not proceed to cross the road to enter the bus until the driver gives a hand signal that it is safe to do so.

While on the bus:

- 4- Students should remain seated- back to back and bottom to bottom at all times.
- 5- Keep the bus clean. There should not be eating or drinking on the bus. No items should be thrown on the bus.
- 6- Keep hands, arms and objects inside the bus. Do not hang outside the windows.

When exiting the bus:

- 11- Students should look both directions before crossing the road.

- 12- Never bend down to pick up something that is dropped on the ground without alerting your bus driver first.
- 13- Walk quickly to clear the area around the bus.

TYRRELL COUNTY SCHOOLS TECHNOLOGY ACCEPTABLE USE POLICY

Technological resources, including computers, other electronic devices, programs, networks and the Internet, provide opportunities to enhance instruction, appeal to different learning styles and meet the educational goals of the Tyrrell County Board of Education (the “board”). Through the school system’s technological resources, users can observe events as they occur around the world, interact with others on a variety of subjects, and acquire access to current and in-depth information.

Use of technological resources should be integrated into the educational program. Technological resources should be used in teaching the North Carolina Standard Course of Study and in meeting the educational goals of the board. The curriculum committee should provide suggestions for using technological resources in the curriculum guides as

provided in policy 3115, Curriculum and Instructional Guides. Teachers are encouraged to further incorporate the use of technological resources into their lesson plans.

The superintendent shall ensure that school system computers with Internet access comply with federal requirements regarding filtering software, Internet monitoring and Internet safety policies. The superintendent shall develop any regulations and submit any certifications necessary to meet such requirements.

A. Requirements for Use of Technological Resources

The use of school system technological resources, such as computers and other electronic devices, networks, and the Internet, is a privilege, not a right. Before using the Internet, all students must be trained about appropriate on-line behavior. Such training must cover topics such as cyber bullying and interacting with others on social networking websites and in chat rooms.

Anyone who uses school system computers or electronic devices or who accesses the school network or the Internet at an educational site must comply with the requirements listed below. All students and employees must receive a copy of this policy annually. Before using school system technological resources, students and employees must sign a statement indicating that they understand and will strictly comply with these requirements. Failure to adhere to these requirements will result in disciplinary action, including revocation of user privileges. Willful misuses may result in disciplinary action and/or criminal prosecution under applicable state and federal law.

1. School system technological resources are provided for school-related purposes only. Acceptable uses of such technological resources are limited to activities that support learning and teaching. Use of school system technological resources for commercial gain or profit is prohibited.
2. Under no circumstance may software purchased by the school system be copied for personal use.
3. Students and employees must comply with all applicable board policies, administrative regulations, and school standards and rules in using technological resources. All applicable laws, including those relating to copyrights and trademarks, confidential information, and public records, apply to technological resource use. Any use that violates state or federal law is strictly prohibited.
4. No user of technological resources, including a person sending or receiving electronic communications, may engage in creating, intentionally accessing, downloading, storing, printing or transmitting images, graphics (including still or moving pictures), sound files, text files, documents, messages or

other material that is obscene, defamatory, profane, pornographic, harassing or considered to be harmful to minors.

5. Users of technological resources may not send electronic communications fraudulently (i.e., by misrepresenting the identity of the sender).
6. Users must respect the privacy of others. When using e-mail, chat rooms, blogs or other forms of electronic communication, students must not reveal personally identifiable, private or confidential information, such as the home address or telephone number, of themselves or fellow students. In addition, school employees must not disclose on the Internet or on school system websites or web pages any personally identifiable information concerning students (including names, addresses or pictures) without the written permission of a parent or guardian or an eligible student, except as otherwise permitted by the Family Educational Rights and Privacy Act (FERPA) or policy 4700, Student Records. Users also may not forward or post personal communications without the author's prior consent.
7. Users may not intentionally or negligently damage computers, computer systems, electronic devices, software or computer networks. Users may not knowingly or negligently transmit computer viruses or self-replicating messages or deliberately try to degrade or disrupt system performance. Users must scan any downloaded files for viruses.
8. Users may not create or introduce games, network communications programs or any foreign program or software onto any school system computer, electronic device or network without the express permission of the technology director or designee.
9. Users are prohibited from engaging in unauthorized or unlawful activities, such as "hacking" or using the computer network to gain or attempt to gain unauthorized or unlawful access to other computers, computer systems or accounts.
10. Users are prohibited from using another individual's computer account. Users may not read, alter, change, execute or delete files belonging to another user without the owner's express prior permission.
11. If a user identifies a security problem on a technological resource, he or she must immediately notify a system administrator. Users must not demonstrate the problem to other users. Any user identified as a security risk will be denied access.
12. Teachers shall make reasonable efforts to supervise a student's use of the

Internet during instructional time.

13. Views may be expressed as representing the view of the school system or part of the school system only with prior approval by the superintendent or designee.

B. Restricted Material on the Internet

Before a student may use the Internet for any purpose, the student's parent must be made aware of the possibility that the student could obtain access to inappropriate material. The parent and student must sign a consent form acknowledging that the student user is responsible for appropriate use of the Internet and consenting to monitoring by school system personnel of the student's e-mail communication and use of the Internet.

The board is aware that there is information on the Internet that is not related to the educational program. The board also is aware that the Internet may provide information and opportunities to communicate on subjects that are not suitable for school-age children and that many parents would find objectionable. School system personnel shall take reasonable precautions to prevent students from having access to inappropriate materials, such as violence, nudity, obscenity or graphic language that does not serve a legitimate pedagogical purpose. The superintendent shall ensure that the Internet service provider or technology personnel have installed a technology protection measure that blocks or filters Internet access to audio or visual depictions that are obscene, that are considered pornography or that are harmful to minors. School officials may disable such filters for an adult who uses a school-owned computer for bona fide research or another lawful educational purpose. School system personnel may not restrict Internet access to ideas, perspectives or viewpoints if the restriction is motivated solely by disapproval of the ideas involved.

C. Privacy

No right of privacy exists in the use of technological resources. School system administrators or individuals designated by the superintendent may review files, monitor all communication, and intercept e-mail messages to maintain system integrity and to ensure compliance with board policy and applicable laws and regulations. School system personnel shall monitor on-line activities of individuals who access the Internet via a school-owned computer.

D. Personal Websites

The superintendent may use any means available to request the removal of personal websites that substantially disrupt the school environment or that utilize school system or individual school names, logos or trademarks without permission.

1. Students

Though school personnel generally do not monitor students' Internet activity conducted on non-school system computers during non-school hours, when the

student's on-line behavior has a direct and immediate effect on school safety or maintaining order and discipline in the schools, the student may be disciplined in accordance with board policy (see the student behavior policies in the 4300 series).

2. Employees

All employees must use the school system network when communicating with students about any school-related matters. Thus, employees may not use personal websites or on-line networking profiles to post information in an attempt to communicate with students about school-related matters.

Employees are to maintain an appropriate relationship with students at all times. Employees are encouraged to block students from viewing personal information on employee personal websites or on-line networking profiles in order to prevent the possibility that students could view materials that are not age-appropriate. If an employee creates and/or posts inappropriate content on a website or profile and it has a negative impact on the employee's ability to perform his or her job as it relates to working with students, the employee will be subject to discipline up to and including dismissal. This section applies to all employees, volunteers and student teachers working in the school system.

TITLE I DESIGNATION

Tyrrell Elementary is a Title I school. The Title I program is a federally supported program that offers assistance to educationally and economically disadvantaged children to help ensure they meet the school system's challenging academic standards. The Title I program provides instructional activities and supportive services to eligible students over and above those provided by the regular school program. When applicable, students must be selected to receive Title I services based on objective criteria that are consistent with federal and state requirements, such as standardized test scores, teacher judgment, and results of preschool screening and home-school surveys. **Qualified Title I schools will operate as school-wide programs** or targeted assisted programs based upon federal eligibility criteria. **School-wide programs will utilize a comprehensive school improvement process enabling schools to serve all students in the school.** Both school-wide and targeted assistance programs shall be based on effective means of improving student achievement and shall include strategies to support parental involvement.

ANNUAL MEETING

Each year, Title I parents must be invited to an annual meeting, at which time parental rights will be explained, programs and activities provided with Title I funds will be discussed, and input will be solicited. In addition, all parents will have an opportunity to evaluate the effectiveness of the Title I programs and the parental involvement policies and plans.
